

Habit Blunk, Jeff Gibbens, Nick Brady

I installed Raspberry Pi Lite (64-bit) for the sake of minimizing the resources taken by my Raspberry Pi running. However, that did not stop me from setting it up so that it has a wifi connection, as you can see from the `wlan0` entry from running `ip a`. I also set up ssh along with my own key for the pi.

```
gamer@triviagame:~$  
logout  
Connection to 10.0.0.232 closed.  
~ ssh gamer@10.0.0.232
